

Six Quick Facts for Renewable Energy Projects

- **The Tri-Cities, WA have a similar annual solar resource to Florida** for tracking technologies.
- **20% - 35% installed price premium** on a square foot basis, based on a \$3MM total project cost. The percentage is higher for smaller jobs, lower for larger ones.
- **Reliable technology**, which works day in and day out with 20+ year OEM warranties.
- **7 -10 year typical ROI** for the renewable energy equipment include local, state and federal stimulus. Shorter paybacks are possible.
- **It doesn't have to be ugly.** We can aesthetically blend technology and architecture, form and function.
- **We'll review or create the risk managed business plans** that get your project financed.

A proven understanding of relevant government regulations, sharply defined business plans, accurate solar and wind energy modeling, and state of the art technology are the four keys to a successful installation.
