

The Benefits of our Expert Technical Legal Consulting

- **We are experts not professors.** Juries have a very sharp ear for coached or rehearsed testimonies. Our experts are comfortable with their field and themselves. They speak to the issues in plain English without arrogance.
- **We represent the full spectrum of technology.** Let us flex a team of proven experts together to meet your specific needs. Let our extensive network save you time.
- **We are accomplished project managers.** Being an expert is not enough. We clearly define risk-managed deliverables and deliver excellence by the deadline.
- **We err on the side of over-communication.** Nobody wants to be blindsided by an expert who foresaw problems but did not think that the issue was important enough to bring up. Our risk meters are sharply tuned. We keep you up to date, and in the loop.
- **We want to be part of the solution.** We do not charge outrageous initial consultation fees. Call us first and get the laws of physics on your side; you will be glad that you did.

Our client facing technical experts take the time to understand the issues of your case, build the winning team, and deliver on time. No surprises, just results.
