

Services

- **Site specific ROI analysis for green-energy projects**, resulting in statistically significant risk management upfront.
- **Accelerated product development cycles** that meet established, measureable targets.
- **Rapid solutions to product**, process and manufacturing problems using proven techniques.
- **Gain the edge** in interactions with German engineering and manufacturing partners. *Wir sprechen Deutsch!*
- **Optimized system performance** at the product level; not sub-optimized parts that compromise the whole.
- **Validated** design of thermal and mechanical systems and components to your sigma level.
